THE 4-H PIG SHOW CHAMPION Mark Nestleroth, Manheim R3, showed his crossbred pig to the Championship in the 4-H Pig Roundup this week. The show was held at the Lancaster Union Stock Yards.

Mark Nestlercth Wins 4-H Club Pig Roundup Title

For the second year in a row Mark Nestleroth, Manheim R3, showed a Crossbred pig tc the Grand Championship in the Lancaster County 4-H Pig Club Roundup held Thursday at the Lancaster Union Stock Yards Judge Lester Burdette, Pennsylvania State University Extension Service livestock specialist, called Nestleroth's Duroc-Yorkshire crossbred entry an outstanding pig with a wide ham and a most desirable carcass

The Reserve Grand Champion of the show was given to Jerry Snader, Ephrata R1, who followed Mark to the top in the Cross Breed Class.

The Breed Grand Champions and Reserve Grand Champion Winners were

Berkshire — Eugene Hosler, Manheim R3, both Reserve and Grand Champion; Chester White — Robert Groff, Peach Bottom, Grand Champion, and Nelson Rohrer, Lititz R3, Reserve; Duroc-Jersey — Eugene Hosler, Manheim R3, and Mark Nestleroth, Manheim R3; Crosses — Mark Nestleroth, Manheim R3, and Jerry Snader, Ephrata R1, Hampshires — Mark Nestleroth, Manheim R3, and Eugene Bollinger, Denver R2; Landrace — Carl Siegrist, Lititz R1, and Glen Sauder, Manheim R3, Poland China — Marlin and Eugene Bollinger, both of Denver R2, Spotted Poland China — Nelson Rohrer and Richard Buckwalter, both of Lititz R3; Yorkshire — Nancy and Mark Nestleroth, both Manheim R3

In the Junior showmanship class, Nelson Rohrer was the winner followed by Eugene Bollinger, Marlin Bollinger, Michael Leininger and Philip Leninger

Top boys in the Senior division were Jerry Snader, Mark Nestleroth, David Heisey, Richard Buckwalter and Eugene Hosler.

In the afternoon sale the Grand Champion pig was sold for 55 cents a pound to Kunzler and Co, Inc. and the Reserve Grand Champion was purchased by Ezra W. Martin Co *for 37 cents a pound*

Poultrymen Stop Attempt To Impose Carton Dating

HARRISBURG — The state poultry industry beat back a second attempt by the Pennsylvania Department of Agriculture Tuesday to impose a mandatory egg carton dating law on farmers and processors.

Poultrymen four years ago stopped an attempt by the agency to incorporate carton dating regulations into the state egg law.

Tuesday's coding proposal by the Bureau of Markets was met with a wave of protests during an egg standards hearing in the state capitol building

Despite a rather bitter fight in 1960, the bureau was apparently convinced an egg carton dating system was necessary to maintain quality and had again proposed its inclusion in the egg code.

Opposition to the date imprint proposal came chiefly from spokesmen for the Pennsylvania State Grange and the Pennsylvania Poultry Federation who contended the regulation would work a labor and financial hardship on producers who market eggs direct to consumers.

Although the majority of persons attending the two-hour session to upgrade state egg law standards were there expressly to protest inclusion of the coding system, others were amazed the issue was up for adoption again after its 1960 defeat.

There was little opposition to other suggested egg standard changes.

Many poultrymen at the hearing suspected the controversial dating proposal was responsible for the lack of publicity given the hearing.

They complained to Jack Grey, deputy secretary of agriculture who served as hearing commissioner, about the absence of office hearing notices.

Imply 'Railroading'

Their statement implied the bureau was attempting to "railroad" the dating provision through anticipated industry opposition

C W. Funk, bureau director, said, however, official hearing invitations were sent to about 1,100 egg processors and distributors throughout the state.

Other department proposals —all of which will apparently be incorporated into the state egg law

— Elimination of consumer grade C classification as obsolete

— Elimination of wholesale Fancy-80 grade because of the difficulty of obtaining 80 per

(Continued on Page 7)

4-H Clothing Winners Listed

The annual County 4-H Clothing Roundup was held on Wednesday at Penn Manor High School. Ten Lancaster County girls were awarded top prizes. The first six winners will compete in the District Dress Revue to be held Monday in Philadelphia

The winners in order, were Mary Alice Graybill, Lititz R2; Virginia Wivell, Columbia R1; Sharynanne Schreiber, New Holland; Judy Longenecker, Holtwood R1; Judy Buckwalter, Lititz R3; Gloria Hershey, New Holland; Margaret Grube, Lititz R3; Rebecca Kling, Mount Joy; Lilli Ann Wivell, Columbia R1; Nancy Rohrer, Lititz R3.

J. Mowery Fred To Send Four Bulls To ABS Stud

A contract for the purchase of Fultonway Schoolmaster from J Mowery Frey Jr, Lancaster, was announced Thursday by Leland W Lamb, Director Dairy Cattle Breeding Program, American Breeders Service, Inc, Chicago, Ill, at a special meeting at the Frey farm for the members of the Holstein Bull Advisory Committee and a group of interested breeders

Schoolmaster has 8 milking daughters in Mowery's herd and one in the herd of Donald Eby, Gordonville, that average 17,847 lb of milk and 700 lb. of fat to show an increase over their dams of 1,698 lb of milk and 51 lb of fat. When compared with their herdmates of the same age from other sires, the Fultonway bull shows a 112 lb of milk and 5 lb. of fat increase.

The Dam of Schoolmaster is Frey's Rachel Ann cow with 26,034 lb. of milk and 982 lb. of fat and a life total of nearly 100,000 lb of milk. The next dam is the famous brood cow Wightwick Glenafton Rachel that is still going strong at past thirteen years of age.

Also made public at the meeting was the purchase of three young sons of Ivanhoe from Fultonway Farms to enter the young sire proving program now being conducted by ABS. One of these youngsters is out of the Rachel cow.

Relation Of Milk In Diet Study

How the amount and kinds of feed in a dairy cow's diet affect her milk — its protein and fat content, as well as its fatty acid composition — is being studied by the Maryland Agricultural Experiment Station under a contract with the U.S. Department of Agriculture.

The studies, being conducted for USDA's Agricultural Research Service, will cover three consecutive 300-day lactation periods by selected groups of high-producing dairy cattle. One group will be fed corn silage alone; another, corn silage and hay in unrestricted amounts; and still another, limited amounts of hay alone All diets will be supplemented with various amounts of concentrates.

The milk produced by these cows will be analyzed for total fat and total protein content and the amounts of saturated and unsaturated fatty

(Continued on Page 4)

Weather Forecast

Temperatures during the next five days are expected to average 2 to 5 degrees above normal. Generally warm throughout the period. Precipitation may total ½ to 1 inch as showers and thunder showers through most of the period. Normal temperature range is 82 in the afternoon with 62 at night.

Weekly Broiler Report

Hatcherymen in the Commonwealth placed 907,000 chicks for commercial broiler production during the week ending August 15, according to the Pennsylvania Crop Reporting Service. This was a decrease of 3 per cent from the previous week but 28 per cent above a year earlier. The 10-week total was 6 per cent above the comparable period last year. Eggs set for commercial broiler production totaled 1,162,000, down 7 per cent from a week earlier, but 8 per cent above last year. The 3-week total was 13 per cent above a year ago. Inshipments of broiler-type chicks past 10 weeks totaled 677,000 or 47 per cent above the comparable period last year. Outshipments of 1,399,000 were down 13 per cent.

Placements in the 22 major producing states totaled 39,566,000 chicks, only slightly below a week earlier, but 7 per cent above a year ago. The 10-week total was 3 per cent above last year Settings at 50,612,000 eggs, were 3 per cent below the previous week, but 7 per cent above a year earlier. The 3-week total of 155,694,000 eggs set was 8 per cent above last year.

Eastern Pa. & New Jersey

Demand for heavy type hens good. Movement moderate & seasonally heavy. Supplies barely adequate. Offerings of light type hens adequate for a fair demand. Some lots of Bronze type hen turkeys moved off farms at 22-24¢ & few tom turkeys at 24¢ Prices paid at farms for light type hens ranged 7-8¢ mostly 7½¢, heavy type hens 13-15¢ mostly 14-14½¢.

Fogelsville, Pa., August 18

(Prices for dock weights, ¢ per lb except where noted.)

HENS, light type 7½-10, mostly 8-9; HENS, heavy type 8 16½, mostly 13-15½, PULLETS 15½-31, mostly 24-30; ROASTERS 8-28½, mostly 23-27½; DUCKS 10-26, mostly 16-18, RABBITS 18½-26½, mostly 20-25½; GUINEAS 82-82½; PIGEONS (per pair) 35-87½, mostly 70-87½, JUMBO SQUAB 45-75, mostly 75. Total coops sold 1190.

● New Holland

(Continued from Page 2)

335 hogs and 35 shoats brought steady to 25¢ higher prices. Retail hogs to local butchers brought 18 75-19 50; grades 1 to 3 went to the packers at 17 75-18 25, and heavyweight hogs sold for 17 25-17 75. Shoats brought 10-14, and sows were 11.50-14 00.

Vealers sold steady at the August 17 auction as 145 head were on offer. Choice and prime vealers were 32 50-35 00, good and low choice 28-32.50; standard 25-28, and cull and common 18 50-25

Lambs brought 20-23 50.

● Delmarva

Live broiler prices in Delmarva remained steady with a good demand for light auction offerings. Prices on high side of range during the 24 hour period ending 10:30 Friday morning.

Ready to cook demand spotly ranging from fair to good. Prices for next week fair and competitive in other production areas, with delivered prices unchanged.

Estimated slaughter by eastern short processors for the weekend was 829,000 head compared to the 810,000 head last weekend.

Live prices at farms during the period ranged from 15 9 to 16 7 on reported purchases of 819,700 head including 453,800 head offered and sold at Thursday's auction at the Eastern Shore Poultry Growers Exchange.

Forty-six per cent of the auction sales were at 16.0 to 16 4.

The Delmarva broiler-feed ratio for the week ending August 14 was down one point from last week at 3 2 Broilers averaged 15.76 per pound and mash cost the grower $98 43 per ton.

Poultry Feed With Built-in Earning Power

"The BITS Family" from Agway offers something new, different and exciting to poultrymen . . . a whole family of feeds that assures maximum earning power from birds throughout their entire life cycle. When your profits are measured in saleable eggs, Agway BITS are the right feed for you. BRE-BITS for breeders is highly fortified for active transfer of nourishment from the breeder hen to the egg and then on to the baby chick. GRO-BITS provide the complete nutrient complex which scientists indicate is needed to grow pullets with full potential. LAY-BITS helps these pullets produce a high volume of uniform eggs with eye appeal, taste appeal and built-in sales appeal. BITS by Agway are formulated with Feed Additive Extras to satisfy the specific needs of your birds at every stage of growth and maturity.
The objective: greater earnings per bird! For highest earnings per bird, Better Buy BITS!

Big W Dairy Cleaners And Sanitizers

A dairy cleaning Program that is designed to meet every cleaning need on a dairy farm.

There is a total of five products and they fall within two main groups as follows:

I. General purpose cleaners — for

1. Washing udders
2. Cleaning milking machines and utensils
3. Cleaning bulk tanks

1. Big W Dairy Cleaner and Sanitizer — quaterinary ammonium acid solution
2. Big W Dairy Iodine — cleaner sanitizer.

II. The pipeline cleaning products.

1. Big W Dairy Pipeline Alkaline Cleaner — Dry chlorinated powder — non foaming and free rinsing.
2. Big W Dairy Sanitizer — 10% chlorine solution for sanitizing pipelines before use.
3. Big W Dairy Acid Rinse — Milk stone remover — Good for pipeline or utensils.

Try some soon. Call your local W Dealer

From Where We Stand . . .

Motorists Want Money's Worth

An old thing the taxpayer gets awfully tired of hearing is the one that goes: "If you want good roads, you have to pay for them."

This is no news to the motorists of America. They have paid for just about every foot of highway in existence, and for a lot more that never will be built because the money has been spent on other things.

In the past eight years the Federal government has collected $34 billion in special highway user taxes, but only $20.6 billion of that went into the Highway Trust Fund. The other $13.4 billion was spent on projects having no connection with roads.

During the next eight years, motorists will pay $52.4 billion more in Federal highway user taxes, but only $32.7 billion will go to build highways. The other $19.7 billion will go into the general fund and from there — who knows?

Some States also use large amounts of highway user taxes for non-highway purposes, the total State diversion amounting to around $400 million every year.

It would be extremely difficult to convince most motorists that they should pay more gasoline taxes — or any other highway user taxes — until all the money they now pay at both the State and Federal levels is put to work building highways.

At least that's how it looks from where we stand.

Drugs And Risks

The safety of prescription drugs has become a subject of controversy and of regulatory action. Like all matters which are beyond the comprehension of the layman, a result may be widely held and unfounded fears in some instances may reach a degree of hysteria.

The fact is that every possible step is taken by the pharmaceutical industry and other interested organizations to assure any drug's safety. The techniques for detecting possible toxicity in every known body system have been tremendously improved in late years. Testing is far more thorough than is generally realized. For instance, the Pharmaceutical Manufacturers Association estimates that, in a recent typical year, its member firms made use of nearly 9 million animals in order to determine whether or not various new drugs were suitable for trial in man.

But the animal tests are not enough. At a certain stage testing on humans must be carried out under the direction of responsible physicians. The number of humans thus involved must be steadily increased until a large enough sample is obtained to determine the safety and utility of the drug in actual clinical practice. During these tests, great numbers of compounds are eliminated. Actually, only one out of an estimated 3,000 compounds originally synthesized by the pharmaceutical manufacturers survives as a drug.

Even so, all risk cannot be eliminated — a truism which applies to all ventures into the unknown. But, measured against the benefits, the risk in drugs produced by reputable manufacturers and prescribed by physicians is seen for the minuscular thing it is. And legislative or regulatory efforts to eliminate all risk, no matter how sincerely meant, can only act as a brake on progress in this most vital of fields.

At least that's how it looks from where we stand.

Guarantor Of A Free Press

Something recently said by the Boonville, Indiana, Standard should be remembered.

"One of the most important by-products of advertising is the American concept of freedom of the press.

"Freedom of the press as it is conceived in the English-speaking world derives financial support from advertising . . . .

"From the time of the American revolution until approximately 1830 American journalism was represented by a profusion of small highly biased political sheets . . . . However, when expanding business firms recognized the need for reaching a new public through advertising, publishers found a neutral and varigated source of support which made them independent.

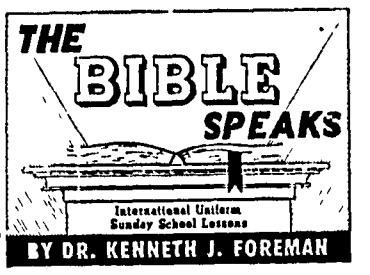
"Indeed, advertising made it imperative that the newspapers should *think in terms of serving the whole* public . . . .

"As government has become more complex, as law and rule by bureaus and agencies have burgeoned, there is more than ever a need for a press free from control of political interests.

"Such a press exists only where advertising support has made it possible for a publication to serve the whole public without fear or favor."

Whatever shortcomings advertising may occasionally be guilty of, its virtues as a supporter of a free press overwhelmingly outweigh them.

At least that's how it looks from where we stand.

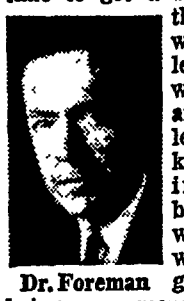


Dependable

Lesson for August 23, 1964

Background Scripture: Deuteronomy 1; 6 through 19.
Devotional Reading: Psalm 75:1-7.

A STUDENT waiter in the school dining hall was complaining about another waiter. "He just took off without saying anything about it, and the rest of us had to carry his job. There wasn't time to get a substitute." Now the student who walked off the job leaving the others with extra work, and all without letting any one know he was leaving, may have been a very good waiter. But he won't stand a good chance of being recommended for the job next year, if he keeps up this sort of thing. No matter how good he is at waiting on table, if he can't be depended on, he's not a good prospect. Dependability is what makes all good qualities strong.



Dr. Foreman

God at the center

The heart of the matter, as usual, is to be found in the Bible. Deuteronomy 6:4-17 is as good a place as any to find dependability —not the word but the thing itself—described plainly. What are the qualities of a dependable life? First of all, it is one that has God, the true God, at the center. It is life oriented to God, taking orders from him. Centrally it is a life filled with love for God. This means devotion, admiration and not mere adoration, it means loyalty through thick and thin. Now there were few if any atheists in those days. Belief in God, some kind of God, was to be found everywhere. Constantly, through all their prophets, the Hebrews were reminded of what kind of God the true and only God is.

Inside and out

The heart—to modern ears—means the emotions. But when the prophet said love God with all your heart, he did not mean love him with all your emotions. Loving God with emotions only turns worship into a kind of binge. The Hebrew word could almost be translated "Stand By", —stand by your God with all your loyalty and all your dedication. The "heart" meant the springs of life, the motives at the very center of a man's life. The point is that in the character of a good man or woman there is an inner and outer side. The outer side is his actions, habits, what we see of him. The inside is what he really is; and if what he is, is not right, then what he does will be all wrong. Nobody likes to be called a hollow person, yet that's just what any of us is if the strength is not there, the God-created strength, on the inside.

Weekdays and Sundays

We don't know whether Moses meant to be taken literally or not when he ordered the Israelites to write the laws on their heads and hands and on the doorposts of their houses. They took it literally, anyway, and tied on their foreheads and on their wrists tiny boxes containing quotations from the Law. Jesus rather made fun of this practice, because it had become a substitute for actually keeping the Law. Anyhow, one point is clear. The conduct, the habit-patterns, the ambitions, the purposeful actions of a man belong in his head and hands and home. What he thinks, what he does, where he goes,— his home life and his work life,—should be all of one piece. You can't live selfishly six days in every week and then break out into unselfishness on Sundays. You can't be dependable as a man and a Christian on one day devoted to goodness. The six bad days will vote the one good day down. People have often tried to divide their lives into compartments, in some of which they could do as they pleased and in others they would conform to what they took to be the will of God. Isn't that in fact what most of us do? How often in the course of an ordinary weekday do we ask ourselves, "What will people think?" and how often do we ask, "What does God think?" What society expects of me may be good; what God expects and demands is good. And he expects it seven days a week.

(Based on outlines copyrighted by the Division of Christian Education, National Council of the Churches of Christ in the U. S. A. Released by Community Press Service.)

Now Is The Time . . .

BY MAX SMITH

MAX SMITH

To Clip Sudan and Sorghum Hybrids

After livestock have grazed down the growth of sudan grass or the sorghum hybrids, the old growth should be clipped at 3" to 4" height; this will eliminate the old stalks and will encourage new, uniform growth After clipping, the new growth should be allowed to reach the recommended growth of the first crop before being grazed again (18" for sudan grass and 24" for the sorghum hybrids.

To Kill Old Sods

Old lawns or old pastures that are to be renovated and re-seeded this fall should have the old growth of grass and weeds thoroughly killed; this may be done by repeated cultivations. When preparing the seedbed the lime and fertilizer should be applied as recommended by a complete soil test. Repeated working and rolling of the area will eliminate low places and get a firm seedbed.

To Use MH-30 Cautiously

Growers who are using the chemical method of preventing suckers on tobacco should be careful that it is used properly. The plants should be allowed to reach 75% bloom before topping and then the proper amount of material should be applied (4 to 6 pints per acre). If an overdose is applied, or if the plant is immature, the quality of the leaf will be lowered.

To Secure Needed Bedding

Many livestock producers need to buy additional bedding material each year, the many kinds of bedding give a wide range for the steer feeder or the dairyman Since many farmers have a good crop of straw in the barn this fall, it might be in order for those in the market to make their purchases before next spring or summer Wheat and barley straw rate very high on the bedding list and could be supplemented with sawdust or wood shavings in dairy barns or box stalls.

● Relation Of Milk

(Continued from Page 1)

acids present.

Exploratory experiments have indicated that the composition of milk fat can be significantly changed by variations in the cow's feed.

These earlier studies showed that unrestricted feeding of corn silage resulted in milk extraordinarily high in saturated fatty acids and correspondingly low in unsaturated acids. They also showed that unrestricted feeding of grain with only a small amount of forage made the milk considerably richer in unsaturated acids, lower in total fat content, and moderately higher in protein content.

The Maryland scientists will determine whether the results of these exploratory experiments are borne out in long-term feeding studies.

The research is under the supervision of Professor J. H. Vandersall of the University of Maryland's Department of Dairy Science USDA's technical representative is Dr. George C Nutting, who heads milk property investigations at the Eastern utilization research laboratory, Philadelphia.

MARKET EGG PRODUCERS

EFFICIENCY PAYS

DO YOU KNOW THAT:

- A 12½% improvement in feed required per dozen eggs equals a saving of approximately $350.00 per 1000 hens.
- That our Early Bird All Mash Laying Feeds will definitely produce BETTER SHELL QUALITY over the laying year?
- That each ½% improvement in breakage can improve your income by $36.00 per 1,000 hens housed?
- A price improvement thru BETTER GRADE of ½ cent per dozen amounts to approximately $100.00 per 1,000 hens housed?
- If your feeding programs gives you 1% better hen house liveability and ½ dozen more eggs per hen housed, it can mean as much as $175.00 extra return per 1000 hens?
- That GOOD records pay big dividends? Without accurate records you CAN NOT fairly judge the value of your program?
- That it's not the START, it's the FINISH that counts.

May We Help You Do A Better Job?

PUBLIC SALE

OF VALUABLE
FARM MACHINERY - CATTLE
and PERSONAL PROPERTY

On Saturday, August 29

AT 11:00 A.M. Sharp

At R. D. 1, Wrightsville, Penna. at Hilltop Ranch, approx. ⅛ mile North of Mt. Pisgah Church. The undersigned having sold his farm will offer at public sale the following —

Oliver No. 550 tractor in A-1 condition with manure loader, Oliver 3 bottom plow, Oliver Mower, Model LS Oliver snow blade, 2 Ford Ferguson tractors, Ferguson side delivery rake type No. D-EO-20, McDeering No. 45 Hay Baler, Massey Harris No. 15 manure spreader, rubber tire farm wagon, Disc, two-section harrow, land roller, two-wheel trailer, rotary cutter, manure spreader, 1953 Ford F250 ¾ ton pickup truck, 1947 Int. pickup for farm use, lot of new oak lumber, locust posts, extension and step ladders, platform scales, bldg. blocks, fence wire, gas cans, oil tank, drums, two chain saws, two sets of tractor chains, metal cabinet, 73 pcs. new sheeting, used tires, paint, rope, chains, 10 bags fertilizer, hand and garden tools, cattle salt, McCray 6 x 8 walk in box complete with compressor, meat block, Empire oil heater, sink, table, chairs, sofa, two mattresses, crocks, jars, jugs, etc.

CATTLE

16 Black Angus cows with calves
3 Hereford cows with calves
1 Black Angus bull 3 yrs. old

AUCTIONEERS NOTE: Farmers and 4-H members if in the need of good cattle be sure to attend this sale for these are some of the finest, also a good line of machinery.

Not responsible for accidents on day of sale.
Machinery & cattle can be inspected August 22, 1 to 4 P.M.
Refreshments Available
Terms: Cash

Crop & Livestock Round-Up

MILK PRODUCTION

Milk production on Pennsylvania farms during July was estimated at 570 million pounds or 5 million pounds below July 1963 according to the Pennsylvania Crop Reporting Service. The month's milk production was the third highest on record for July. It was exceeded only in 1961 (580 million pounds) and again in 1963 (575 million pounds). Milk production for the first 7 months of 1964 totaled 4,317 million pounds or 57 million below the comparable period in 1963 Based on the July 1, 1962 Pennsylvania estimate, July milk production was at a level to provide 1 62 pounds or 75 quarts daily per person in the State

The number of milk cows in the Commonwealth during July was estimated at 820,000 cows the same as in June but 26,000 fewer than in July 1963 Cow numbers have decreased rather sharply in the last couple of years The number now estimated is the lowest since 1930 It appears that a gradual fall build-up of herds has off-set the dispersal of herds this past month. It is expected that this picture will change somewhat when dairymen cull their herds rather rigorously before putting them on full winter feeding.

EGG PRODUCTION

The number of eggs produced by the Commonwealth's laying flock during July totaled 256 million, down seasonably from June, but 2 per cent above July 1963 according to the Pennsylvania Crop Reporting Service. This July production is the second lowest for the month in recent years, only last year's total (lowest in 10 years) was lower Increased production over last year was caused by a larger number of layers and a higher rate of lay.

Hens and pullets of laying age in the State totaled 13 8 million a slight increase over the previous months' number of 13 7 million and just above the year ago figure

July rate of lay at 18 54 eggs per layer was down seasonally from June but almost 2 per cent higher than July 1963. The rate of lay declined from June because of the increased placement of pullets in the flock.

Prices received by farmers for eggs averaged 34 cents per dozen, a cent above the previous month and the same as a year ago. The egg-feed ratio was more favorable than a month ago because of higher egg prices, and higher than a year ago because of lower feed prices.

WINTER GRAINS

Record and near record yields of winter wheat, rye, and barley were produced this year on Pennsylvania farms according to the Pennsylvania Crop Reporting Service. Winter wheat and rye surpassed last year's record yields by one-half and one bushel respectively while barley equalled the record set in 1961. Hot humid weather near the end of July interfered with harvesting of small grains. Temperatures throughout July were warmer than normal except during the second week.

FRUIT CROP

Prospects for a large fruit crop in the Keystone State is forecast by the Pennsylvania Crop Reporting Service Harvesting of both sweet and sour cherries is about over while picking of early varieties of apples and peaches is underway. Normal rainfall for the remainder of the growing season will be needed for continued good growth and sizing of the fruit crop.

The peach crop estimate for Pennsylvania is 3.1 million bushels, the same as the rec-

HOW IS YOUR CORN'S HEALTH? Tissue testing of corn was done recently by P. L. Rohrer & Bro., Smoketown and California Chemical Co., Ortho Division. Pictured are (left to right) B. D. Leaman and Max Maichelle, Ortho Agronomist; Gerald Rohrer; of Rohrer's; Edward Gladding, Ortho fertilizer representative; Amos Rutt and Ralph Garber of Rohrer's. Farmers were invited to bring typical stalks of corn to the testing station. By applying certain acids to certain areas of the plant the testers were able to determine whether low, medium or high amounts of nitrogen, phosphorus and potassium were present. The information from the test allows a farmer to evaluate his fertilizer program. It was reported that about 80% of the tests revealedvery sound programs.

● Poultrymen

(Continued from Page 1)

cent AA quality for the pack

— Elimination of wholesale Trades grade as obsolete.

— Elimination of wholesale and consumer Pullet size or weight class in favor of the Small designation.

— Revised the wholesale weight variation tolerance from 5 to 10 per cent.

— Dropped yolk centering requirement in determining egg quality

— Banned use of "duties" in filling wholesale grade requirements.

— Reduced consumer grade minimum net weight on Jumbo size from 30 to 29 ounces a dozen and from 56 to 54 pounds for each 30 dozen eggs.

— Narrowed the air cell standard for AA and A quality eggs. No more than 1/8-inch movement permitted for AA quality and 2/8 inch movement for A quality in any direction as egg is rotated.

K M Souders, general manager of Producers Cooperative Exchange, Coatesville, testified the standard could work a hardship on producers "since it is hard to candle on that basis."

In a written brief filed in advance of the hearing, a suggestion was received requesting the tolerance for cracked eggs should be increased.

But poultrymen recommended against a tolerance increase, in view of alleged link between salmonella derby and cracked eggs

There was also discussion of deleting the section of the egg law concerning marking of shell eggs cartons in favor of developing them as a separate department regulation.

Such action would have to be taken, Grey said, at a separate hearing

Changes the department decides to implement will probably be approved in about 10 days and become law 90 days later

Women's Committee Host At Luncheon

The Women's Committee of the Lancaster County Farmers Association was host at a luncheon on Thursday, August 12th at the Landis Valley Motor Inn with 9 ladies from the League of Women Voters as guests

Mrs Noah Wenger served as toastmistress Harold Rohrer, state board member of PFA, and Chester Hime from the State PFA office spoke to the group to acquaint them with the PFA and also the national Farm Bureau Federation and what it stands for.

this is perfection

this is STAALKAT

(exclusive with Anderson)

Our Best Salesmen are STAALKAT owners themselves

For an enthusiastic testimonial ask the man who owns a Staalkat egg grader He'll tell you what accuracy really is . . . how precision scales place each egg in its exact grade There's no need to set your scales with an extra tolerance to assure honest grading. Owners state that this feature alone is worth as much as an extra 1c per dozen. Figure this saving on your volume.

The Staalkat principle never lets one egg touch another from candlers through scales. Bumping and tumbling that cause cracks and checks are eliminated Staalkat dependability means a higher percentage of top grades . . . higher profits . . . year after year of dependable, peace-of-mind service. Imagine a machine weighing nearly two tons that is so carefully crafted a single ½ h.p motor drives it. That's perfection . . . that's Staalkat.

Join the successful egg producers who depend on Staalkat. Trained technicians will have a Staalkat system operating in your plant in a matter of hours. *Write today or call your Anderson man.*

Easy Dishes For Quick Preparation

By Mrs. Richard C. Spence

SPENCE

Here's a real put-together-in-a-hurry dish — Marbled Macaroni. For lunch or dinner it's a quick, true economy dish. The basic ingredients are elbow macaroni, tomato sauce, canned luncheon meat, cream of celery soup and American cheese. None of these ingredients ranks high in the budget book, so Marbled Macaroni is a good recipe to keep for those end-of-the-budget days. You're certain to have almost all these ingredients tucked either in the cabinet or refrigerator all the time, so this easy dish makes a good last-minute or emergency meal as well. Double this recipe and freeze one-half to be used later on.

MARBLED MACARONI

8 ounces elbow macaroni
1 8-ounce can tomato sauce (about ¾ cup)
1 tablespoon flour
1 12-ounce can luncheon meat, cut in ¼-inch squares
¼ cup finely chopped onion
¼ cup finely chopped green pepper
1 teaspoon Worcestershire sauce
Dash pepper
1 10½ ounce can condensed cream of celery soup (about 1¼ cups)
½ cup shredded process American cheese
Buttered enriched bread crumbs
Dash paprika

Cook macaroni in boiling salted water until tender, about 7 minutes. Drain. Blend together tomato sauce and flour. Cook until thick, stirring constantly. Combine tomato mixture, meat, onion, green pepper, Worcestershire sauce and pepper. Stir soup until smooth, then mix lightly with macaroni. Spread half of macaroni mixture in greased 9-inch square baking dish. Cover with meat sauce, then with remaining macaroni mixture. Sprinkle with cheese, then with buttered bread crumbs and paprika. Bake in moderate oven (350 degrees) 35 to 40 minutes. 4 to 6 servings.

PARISIAN OMELET

8 ounces elbow macaroni
½ cup crumbled, cooked bacon (6 slices)
3 tablespoons butter or margarine
¼ cup enriched flour
1 cup milk
4 eggs, separated
1 teaspoon salt
⅛ teaspoon pepper
¼ cup finely chopped green pepper

Cook macaroni until tender. Drain. Cook bacon in skillet Melt butter or margarine in saucepan over low heat. Blend in flour. Remove from heat and stir in milk. Return to heat. Heat to boiling and boil one minute, stirring constantly. Beat egg whites until stiff but not dry. Add salt and pepper to yolks and beat until thick and lemon-colored. Fold white sauce into beaten egg yolks. Combine egg yolk mixture, macaroni, bacon and green pepper. Fold egg whites into macaroni mixture. Drain all but 1 tablespoon bacon drippings from skillet and heat slightly. Spread omelet mixture evenly in skillet. Cook over moderate heat for 10 minutes. Then bake in moderate oven (350 degrees) 15 minutes or until top is dry and light brown. Serve immediately. Makes 4 to 6 servings.

CHEESE-ARONI PIE

1 cup bread crumbs
¼ cup melted butter or margarine
⅛ teaspoon salt
8 ounces elbow macaroni
⅓ cup butter or margarine
⅓ cup flour
1 teaspoon salt
1¼ cups milk
1 8-ounce package process American cheese, cut in ½-inch squares, (about 1½ cups)
2 tablespoons toasted slivered almonds

Mix together bread crumbs, melted butter or margarine and ⅛ teaspoon salt. Press firmly over bottom and sides of 9-inch pie pan. Cook macaroni until tender. Drain. While macaroni is cooking, melt ⅓ cup butter or margarine in heavy saucepan Stir in flour and salt. Gradually add milk and heat to boiling, stirring constantly. Add cheese, reduce heat, and cook, stirring constantly, until cheese is melted and sauce is thickened. Fold macaroni into cheese mixture and pour into crumb pie shell. Sprinkle top with almonds. Bake in moderate oven (350 degrees) 25 minutes Cut into wedge-shaped pieces to serve

MACARONI DINNER DISH

8 ounces small shell macaroni
1 pound brown and serve link sausages
¾ cup chopped onion
⅓ cup flour

(Continued on Page 9)

FARM BUREAU

TWIN TEST

GASOLINE
for Car Performance

Laboratory and field tests prove that Farm Bureau "Twin tesT" gasolines give top performance on the highway. High specifications assure long engine life, trouble-free performance, greater value per mile.

for Truck and Tractor

Farm Bureau "Twin tesT" gasolines have been proved on thousands of Pennsylvania farms by Pennsylvania farmers. They give the extra margin of power needed for heavy work loads. They carry a higher octane rating for any and all power demands.

For The Farm Wife

(Continued from Page 8)

2 tablespoons brown sugar
½ teaspoon salt
¼ teaspoon dry mustard
Dash pepper
1 cup water
⅓ cup vinegar
1 hard-cooked egg
⅓ cup minced parsley
Paprika

Cook macaroni until tender, about 7 minutes. Drain. While macaroni is cooking, brown sausages in skillet. Add onion and cook until browned. Remove sausage mixture from skillet and drain off all but 2 tablespoons fat. To remaining fat in skillet, add flour, brown sugar, salt, mustard and pepper. Blend well. Gradually add water and vinegar, stirring constantly, and cook until slightly thickened. Cut sausages and egg into small pieces Combine sausage, egg, parsley and macaroni and add to hot vinegar sauce Mix well. Sprinkle with paprika. Serve hot 4 to 6 servings.

* * *

SEA-SHELL STEW

⅓ cup flour
1 tablespoon salt
½ teaspoon dry mustard
¼ teaspoon pepper
2 pounds beef stew meat, cut in 1-inch cubes
2 tablespoons fat
2 quarts water
1 bay leaf
½ teaspoon whole allspice
1 tablespoon anchovy paste
2 cups 1½ inch cubes yellow onion (3 medium onions)
2 cups sliced carrots
12 ounces medium shell macaroni
1 10-ounce package frozen cut green beans (about 2 cups)
½ cup water

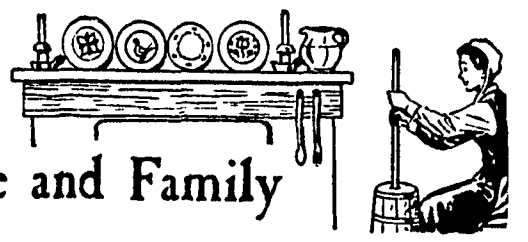
Mix together flour, salt, mustard and pepper Dredge beef in seasoned flour mixture Reserve excess flour mixture. Melt fat in heavy skillet or Dutch oven. Brown meat in hot fat. Add 1 quart of water, bay leaf, allspice, and anchovy paste. Cover and simmer until meat is tender, about 1½ hours. Add remaining quart of water, onions and carrots Heat to boiling. Reduce heat, cover and simmer 15 minutes. Add uncooked macaroni, cover and cook 10 minutes longer. Add green beans and cook uncovered 10 minutes, or until beans and macaroni are tender. Blend reserved flour mixture with ½ cup water to form a smooth paste. Stir into stew. Cook until mixture is thickened Serve hot. 6 to 8 servings.

* * *

SAN FRANCISCO SALAD

8 ounces elbow macaroni
1 10 ounce package frozen peas (about 2 cups)
1 13-ounce can evaporated milk (1⅔ cups)
1 tablespoon unflavored gelatin (1 envelope)
1 cup mayonnaise or salad dressing
1 cup small curd cottage cheese
¼ cup finely chopped onion
2 tablespoons chopped pimiento

(Continued on Page 10)



For the Farm Wife and Family

Ladies, Have You Heard? . . .

By: Doris Thomas, Extension Home Economist

THOMAS

Worth Knowing

Italian plums are sweet, purple plums . . . excellent for filling the fruit bowl, for stewed fruit, salads, and desserts Also they are fine for pies, puddings, jams, jellies, and preserves. The 1964 crop of Italian plums in the three major producing states of Idaho, Oregon, and Washington is estimated to be 48 percent larger than last season's crop

Plan your food marketing in advance, preferably with a pencil and paper Advance planning means there will be less chance of having to buy "emergency" foods which may cost more, or of buying on impulse at the store

Compare prices before buying fresh, frozen, or canned foods. Sometimes the food in one form is less expensive, sometimes in another For example, a large can of grapefruit juice may be less expensive for each serving than fresh oranges or grapefruit On the other hand, during certain seasons, fresh oranges may be less expensive than canned or frozen orange juice.

Ideas to Help You Get More Food Value for Your Dollars

When buying meat, consider the amount of lean meat in the cut, not the cost per pound. Some cuts contain bone, gristle and fat waste For example, ground beef and beef short ribs may cost the same per pound, but ground beef will give twice as many servings per pound as short ribs Bacon is one of the most expensive foods you can buy in terms of protein value

Beef, lamb, and pork liver give unusually high nutritive returns for money spent

Chicken and turkey have a large proportion of bone to lean, but often are bargains compared with other meats Fish is high in nutrients, often low in cost

Eggs are usually a less expensive source of nutrients than most meats

Study bread labels before you buy Choose bread for weight and food value, not by the size of the loaf. Look for whole-grain or enriched bread, and bread that contains milk.

Society 3 Hears Talk On Civil War

Society of Farm Women 3 met at the home of Mrs. Willie Stober, Adamstown. Paul Gerbinger, Adamstown, was the guest speaker. His subject was "Pennsylvanians During the Civil War."

His emphasis was on Lancaster County, telling of the days of 1863. He described outstanding generals from the City and County, plus other phases of the military

The lack of food in those days was most important in the progress of Lancaster County Because of the high prices and the quantity of food produced here in the county, the Lancaster area became one of the richest counties in the country.

Farm Women 18 Sew Cancer Pads

The monthly meeting of Farm Women Society =18 was held at the home of Mrs. David Hess, Lancaster, R6.

Devotions were led by Mrs Melvin E Hess The meeting was devoted to sewing 200 cancer pads.

Mrs T Hershey Rohrer won the baby picture guessing contest.

The next meeting will be held Sept 26 at the Manheim Auto Auction when they will entertain Farm Women Society =14.

The September meeting will be held in the social hall at Lincoln Lutheran Church Miss Alva Stuber will be hostess

● For The Farm Wife

(Continued from Page 9)

¼ cup sliced black olives
1 tablespoon lemon juice
1 teaspoon salt
1 teaspoon Worcestershire sauce — Dash Tabasco

Cook macaroni until tender drain and rinse in cool water. While macaroni is cooking, cook peas according to package directions. Stir gelatin into ¼ cup milk. Let soak 5 minutes. Scald remaining ¾ cup milk and add to gelatin mixture, stirring until gelatin is dissolved Blend into mayonnaise or salad dressing. Chill gelatin mixture until it is the consistency of unbeaten egg white, about 30 minutes. Combine macaroni, peas, cottage cheese, onion, pimiento, black olives, lemon juice, salt, Worcestershire sauce and Tabasco Chill. Fold gelatin mixture into macaroni mixture Turn into 2 quart mold and refrigerate until firm, about 2 hours Remove from mold and serve immediately 4 to 6 servings

Any salad that is left over will keep several days if covered and refrigerated To serve later, mix the salad with chopped cooked shrimp or tuna or chicken and accompany with little sandwiches, fruit and milk for lunch

Nancy Risser Attends AIC In Michigan

Nancy Risser, daughter of Mr. and Mrs. Allen K. Risser, Leola R1, was one of a group of ten who attended the American Institute of Cooperation, Aug. 9 to 12 in Michigan, sponsored by the Metropolitan Milk Producers Cooperative Bargaining Agency. She will be a junior at Manheim Township High School this fall. The group met in Syracuse, N.Y. and traveled to East Lansing, Mich., by car. They stopped at Niagara Falls, drove through Canada, and stayed one night on the road at Port Huron, Mich. They arrived at the campus of the Michigan State University, Sunday afternoon, Aug 9

The sponsor, the Metropolitan Milk Producers Cooperative Bargaining Agency, is a cooperative bargaining organization whose members are dairy farmers in New York, New Jersey and Pennsylvania The delegates were selected on the basis of leadership, 4-H, FFA, FHA, and cooperative activities, and on the basis of an essay written about the value of farm cooperatives to a community. Nancy has been a member of the 4-H Holstein Dairy Club and the Garden Spot community club six years.

The American Institute of Cooperation was chartered as a University in 1925. Its primary purpose is to educate members on cooperative subjects. The AIC is financed by dues from farmer cooperatives in the United States, Canada and Puerto Rico. This year the American Institute of Cooperation was held August 9-12 on the Michigan State University campus. It will be held in Missouri next year.

Nancy was one of the more than 600 youth delegates from all over United States and Canada who participated in the Youth Program. Some of the many things she did during her four day stay included attending general and youth sessions, listening to speakers on cooperative subjects, and participating in youth discussion sessions One full day was reserved for tours of local cooperatives and points of local interest. She visited the Michigan State museum as well as a 2500 acre, 1300 head dairy farm and a local dairy processing cooperative. Every delegate took a quiz on farm business which tested knowledge of the American Free Enterprise System, especially farmer cooperatives

9 REASONS
why you're ahead

McCORMICK INTERNATIONAL® 16 FIELD HARVESTER

1 You get big, 40-ton per hour capacity, yet the 16 is priced with the lowest on the market!

2 You get maximum strength with minimum weight through brand new design.

3 The lightweight 16 rides on top of soft ground where heavier units bog down.

4 You can green-chop with 2-3-plow power and switch to bigger power for fast silo filling.

5 9-knife cutter head cuts shorter than ¼-inch. Fine cut feed takes up less space in the wagon and silo . . . cattle clean up after every feeding.

6 You can green-chop daily feedlot ration in the morning, and . . . in less than 7 minutes . . . switch units to cut corn silage.

7 You get longer life from the built-in quality. Just one example is the long-life roller chain. Not one V-belt or a single link of stamped steel chain is used on the 16!

8 You're ready to go sooner with the 16. Sharpen knives right on the machine . . . grease fast . . . only 8 fittings with corn unit attachment.

9 You get versatility and safety. For example, you can raise the entire chopper to high axle position . . . then tilt harvesting unit forward to avoid picking up rocks. Raise and lowers harvesting units without changing delivery spout angle.

Available with corn head, cutter bar or windrow pick-up units.
Come in. See the 16 chopper!

KILL EVEN THE "SUPER" FLIES

It might be said that flies are flies. But there are strains of "super" flies that have developed an immunity to older insecticides.

Purina Fly Baits—(Dry Killer and Sugar Base) are highly effective against "super" flies as well as the ordinary kind. They contain *two* remarkable insect-killers that kill flies outright . . . plus "come-and-get-it" attractants that lure flies, then kill 'em in bunches.

Purina Fly Bait—(Dry Killer) is a dry, granular scatter-bait for use on rough surfaces. **Purina Fly Bait** (Sugar Base) is a finely granulated sugar scatter bait well suited for use on wood flooring.

Control flies this summer with powerful, low cost, Purina Fly Bait (Dry Killer) or Purina Fly Bait (Sugar Base)—available at our store.

● Crop and Livestock

(Continued from Page 6)

old production in 1954 This is an increase of 55 per cent over last year and 14 per cent above the 5 year average

POTATO PROSPECTS

Production of all potatoes in the Keystone State is estimated to be 5 per cent greater than last year, according to the Pennsylvania Crop Reporting Service The forecast of 7 8 million cwt, compares with 7 4 million cwt, in 1963, and the 1958-62 average of 7 7 million Yield is expected to average 199 cwt per acre.

CORN AND HAY

More corn and hay are in prospect for Pennsylvania farmers this year according to the Federal State Crop Reporting Service

The corn crop, based in August 1 conditions, is expected to yield 57 4 million bushels of grain, one-third more than the total produced last year when the crop was hurt by drought The 1964 production estimate is 2 per cent higher than the 1958 62 average

Total hay production is estimated at 3 4 million tons 6 per cent above last year Expected yield per acre is 1 58 tons, slightly better than in 1963 but short of the five-year average of 1 74 tons

WHEAT

The 1964 wheat crop in Pennsylvania set an all-time record for yield per acre. 31 bushels, the Federal-State Crop Reporting Service announced

Total production of 14 9 million bushels is one per cent above last year, but slightly under the 1958 62 average

Barley and rye matched last year's record yields per acre of 43 bushels and 27 bushels respectively.

Oats, however, appear to be falling short of the sensational record of 1963. The crop that year astounded the experts with a yield of 55 bushels per acre—eight bushels more than the previous high Production estimates this year indicate a yield of 46 bushels per acre.

STATE HATCHINGS DECREASE

The broiler-type chick hatch during July 1964 (3.9 million) was about the same as June but 2 per cent below July a year ago The January-July total of 27 3 million was down 6 per cent from the first seven months of 1963 Egg-type hatchings (2 0 million) were 32 per cent below June and 7 per cent below July a year ago The seven month total of 22 1 million was 10 per cent below the comparable period last year

New John Deere 237 Corn Picker
raises the speed limit in high-yield corn

Shift up! Pick at speeds up to 5 mph, even when yields run well over 100 bushels. Long, tapered gatherers and high inside shield, funnel stalks right in. Even tangled stalks seldom escape three roller-type gathering chains. There's new gathering and snapping speed. And the 237's spiral snapping rolls cut shelling loss in half

Faster elevators with higher flights move corn up fast. Trash goes too, aided by new rotating trash paddles. New husking rolls — cast-iron spirals against serrated rubber — peel husks, pull trash through. You pick clean. See the new 237 soon. Ask about the Credit Plan.

PIONEER. BRAND ALFALFA

Get the Right Alfalfa for the Job...

See your PIONEER. seed salesman

To get the most from your alfalfa acres, get the right alfalfa for the job from your Pioneer seed salesman. He offers a full line of forage alfalfas for any rotation.

- X583 BRAND—known to produce high yields of good quality hay for short rotations.
- ARNIM —A superior alfalfa for short to medium term rotations.
- VERNAL and RANGER—for long term rotations.

Plant the alfalfa that works to the limit on every acre. Be assured of high purity, high germination. Get it from your Pioneer salesman—who also offers your best selection of proven, high-yielding hybrid corns.

PIONEER. BRAND CORN and ALFALFA

See or Call **Your Local Pioneer Dealer**

Choose the Right protein level for your cows...

USE	WITH
14%	For good legume hay, good pasture
16%	Fair legume hay corn silage with excellent legume hay
18%	Fair grass hay poor legume hay, corn silage with good legume hay
20%	Poor mixed hay, corn silage with poor hay

Without changing feeds

WAYNE 32% Dairy Krums
An all-vegetable protein supplement for premium nutrition. Contains added vitamin A & D sources. Also available with extra 10,000 units of vitamin A per lb.

WAYNE 42% Dairy
Combines the economy of urea with vegetable protein. Also available with extra vitamin A.

You can change your protein level in your dairy grain ration by simply varying the amount of Wayne Dairy Supplement you add to it. Thus when a change in roughage dictates a change in protein level, your grain ration has only a moderate change in taste and formula. No need to make Bossy change to an entirely new grain ration at the same time she changes roughage! Wayne Dairy Supplements are economical too—let you utilize home grains to make a top-quality dairy ration.

ELIZABETHTOWN-DONEGAL 4-H CLUB

The August meeting of the Elizabethtown Donegal 4-H Community club was held at the home of Bill Hackman, R3, Elizabethtown, with the Garden Spot Community Club as guests.

At the meeting presided by Jay Bixler, the members answered roll call by reporting on their projects. It was announced that the club would be the guests of the Lincoln Community Club on Tuesday, August 18. The president appointed the following committees for the September meeting: Food — Donald Miller, Michell Risser and Jeff Witman; Program — Cynthia Roland and Mary Hess.

Following the business meeting the members presented a skit, demonstration and poem, after which a corn roast was enjoyed by all.

The September meeting will be held at the home of Donald Miller, R1, Elizabethtown.

Chop-All Ever-Sharp Knives

STAY SHARP ALL SEASON

Ever-Sharp knives that hold a razor edge all season! New cutter bar that holds a sharp edge up to 20 times longer than ordinary bars! Both features are standard with all Gehl Chop-Alls to give you a full season of short-cut, non-stop chopping . . . from the first load of hay to the last load of corn.

The new Gehl knives are chrome-edged to stay sharp, chop clean, to give you short-chopped feed. The new cutter bar is faced with tungsten carbide, the same material used to cut or drill steel. Together, the two give you trouble-free chopping and a short, fine, uniform cut — best for feed, best for storage.

GEHL More than a century of service

HERE'S PROOF! At the Farm Progress Show, it was proved that you can get up to 28% more silage in your silo with Gehl's short cut.

Make us Prove it with a Demonstration!

Robert Groff Has New Herd Average

BRATTLEBORO, Vermont — A new herd production average for milk and butterfat has been announced for the Registered Holstein herd owned by Robert C Groff, Quarryville.

As reported by The Holstein Friesian Association of America, the herd has completed its latest testing year with a per-cow average of 15,106 lbs. of milk and 582 lbs. of butterfat, based on 28 completed lactation records

Pennsylvania State University supervised the weighing and production testing procedures in cooperation with the official herd improvement programs of the Holstein Association.

This performance level compares favorably to the average U S. cow's annual output of 7,500 lbs. of milk and 275 lbs. of butterfat Production averages are calculated on the commonly employed, two milkings per day, 305-day, mature equivalent basis to provide a comparsion standard for selection in Registered Holstein breeding programs.

PUBLIC SALE OF DAIRY COWS AND MILKING EQUIPMENT

On Thursday, August 27, 1964 at 1 P.M. at R. D. #2, Felton, Pa. in Chanceford Twp. approx. 1 mile North of Chanceford Gospel Tabernacle. The undersigned will offer at public sale the following —

PEQUEA VALLEY 4-H

A fashion show was the feature of the final meeting of Pequea Valley 4-H Club on Monday. The meeting, attended by mothers, was held at the Intercourse Fire Hall.

Plans were made to attend the clothing round-up at Penn Manor High School, Millersville.

MANHEIM TWP. 4-H

The Merry Stitchers 4-H Sewing Club of Manheim Township were the guests of the North Lancaster Kiwanis Club Wednesday evening at the Stock Yard Inn. The Kiwanis Club sponsored the 4-H Club throughout the year.

The Merry Stitchers presented their final fashion show and were given gifts according to years in club work. The girls also received their record books, 4-H pins, and score sheets from the judging Wednesday at the Penn Manor Round-up.

Mrs. Hubert Royer, Mrs. Henry Kettering and Mrs. Ray Ober are leaders of the Club.

GUERNSEY SALE
At the Ass'n. Sales Pav., 6 mi. E. of Lancaster.
Thursday night, August 27, 7:30 P.M. Sharp!
45 Head — all cows or bred heifers
25 fresh or due within 30 days of sale date
Vacc. T. B. and Bang's Cert. Dehorned

Because of feed shortage in northeastern Penna. Ward Kittle, Troy, Pa. decided to let our fieldman pick 35 of his best for this sale. They include nine grades, no records, but good sound commercial cows that will make you money.

Additional consignments from western Penna. that are fresh or heavy in calf.

Because of the many cattle we have sold recently we predict a buyer's market. Get them at your own price to supplement your fall production.

SALE MANAGED BY:
PENNSYLVANIA GUERNSEY BREEDERS' ASSOC.
P. O. BOX 458 CAMP HILL, PA.

P. B. GUERNSEY SALE

TUESDAY - AUGUST 25, 1964 — 12:30 NOON.

At the Shippensburg Fairgrounds, Shippensburg, Pa. Go through the main street of Shippensburg, turn South at Fayette St., go two blocks and turn Right to the Fairgrounds.

2 BULLS (Serviceable age) — 18 COWS — 18 BRED HEIFERS. T.B. & Bangs Cert. - Vaccinated - Dehorned.

All either fresh or due in August or September.

Guernsey Breeders from Carlisle to Hagerstown, Md. throughout this area have concentrated to put their best foot forward with consignments they would rather keep themselves. They know these will make friends and maintain and continue the fine reputation that the many Guernsey herds have in this area.

They will maintain your Fall production and will be foundation stock that will benefit your future Guernsey program.

We sell on commission

Mr. Dairyman:

Would you spend $1.00 to get $3.00 in return?

Of course you would. Here's how!

Money spent for dry cow feed, if of the right kind and properly used, is like loaning money on sound collateral to be repaid in 90 days on the basis of $3.00 return for each dollar loaned.

Feeding your dry cows the PIONEER way, may return your feed dollars back to you three-to-one.

A dry cow, fed only 600 lbs. of PIONEER DRY & FRESH may return as much as 2000 lbs. more milk.

PIONEER DRY & FRESH and THE PIONEER FEEDING PROGRAM gives the dry cow the nutrients she needs to maintain body reserves, produce a vigorous, healthy calf, and freshen strong, ready to go into top production and maintain the pace right through her lactation.

So why not put some money into that bank you have in your barn, and get it back three to one.

There is profit in PIONEER.

Stop in soon or ask our servicemen about the PIONEER DRY COW FEEDING PROGRAM.

REMEMBER there is a PIONEER FEEDING PROGRAM to fit your need.

PIONEER

. . . the feeds with balanced amino acids for better protein building

Mr. and Mrs. Jefferson Yoder and son, Carl, of Rocky Side Farm, R. D. 1, Elverson, Pa.

From Cars to Cows...

The Jefferson Yoder story should be an inspiration to young folks today who want to farm but cannot raise the initial investment. How did Jeff Yoder do it? HE DROVE INTO DAIRYING!

Raised on a farm in Mifflin County, Pa., Jeff Yoder was determined to have a farm of his own. In 1948 he began hauling new cars with a tractor-trailer, delivering cars along the eastern seaboard for five years. In 1953 he was able to buy the farm he wanted. He also bought some calves of outstanding breeding stock. While his younger brother, Nick, raised the calves Jeff continued his tractor-trailer hauling for three more years. In 1956 Jeff Yoder quit driving and began milking.

Has Jeff Yoder been successful? Let's look at these official DHIA records for the last four years:

Year	Milk (lbs.)	Fat (lbs.)
1960	14,262	537
1961	15,219	572
1962	15,172	580
1963	16,239	623

This herd has some top producers! Look at these records:

	Days	Milk (lbs.)	Fat (lbs.)
Cow No. 12	365	23,767	1050
	305	21,442	928
Cow No. 11	354	24,025	912
	305	21,601	818
Cow No. 28	302	21,712	833

In the foreground — Cow No. 12, outstanding producer

The Rocky Side herd

Here is a part of the 30-cow Rocky Side herd. There are also about 30 heifers ranging in age from six months to near calving. These heifers will serve as replacements and to enlarge the herd. The herd at Rocky Side farm is basically "Ragapple" breeding and has been carefully built around outstanding foundation animals. All bull calves are raised. Some are sold for breeding, and others are marketed as steers.

Here's the way Jeff Yoder fed his cows at Rocky Side Farm. Red Rose 34% Dairy Supplement was used to balance home-grown grains. Jeff believes in the nutritional boost that Red Rose Rumenator Pellets offer and feeds it to his calves, milkers and dry cows. He also includes Red Rose Free-Choice Mineral and other Red Rose specialty feeds in his feeding program.

The Rocky Side herd proves the old adage once again — Good Management, Good Breeding, and Good Feeding equals SUCCESS!
